## 2017 School Bond Referendum

A Quality Education System is vital to our Community Economic Development efforts!

Companies within Worthington and those companies considering moving here will look at our Education System as an asset and a resource first and foremost.

People considering relocating to our Community will also look at our Education System as a high priority!

Worthington and the surrounding area will not grow and will not move forward without a High Quality and Vibrant Education System.

I have heard from many Mayors around Minnesota that have actively supported the local bond referendums in their Communities. All say that after these Referendums have passed there is a Noticeable Difference in Economic Development activities.  
Renewed interest in company expansions!!!

The diversity in our community is an asset that Worthington needs to appreciate and embrace!

A Worthington High School graduate is

**Ready for Today's World.**

They have benefited from Class Room discussions that includes the Diverse views of over 12 different cultures!

It is proven time and again that Communities who make it a priority to

**INVEST**

Are eventual winners in Economic Development.
